- Demand for landed medium cost residential, industrial and commercial property market is expected to remain good especially in Iskandar Malaysia region for the next few years.
- Continue to concentrate our effort to develop landed residential properties in Bandar Cemerlang, main contributors to Group earnings in the next few years.

STRATEGIES

STRATEGIES

- In view of the normalization after re-opening of all economic sectors and international border and the improvement in the labour market, the Group will continue to focus on landed medium cost and affordable housing development.
- Continue to develop in smaller phases to be conservative.
- Continue to sell substantially built and completed buildings to meet demand from customers preferring to buy substantially built/completed buildings.
- Pre-built factories for rent to industrialists. Significant demand is expected for rental market at NCIP by foreigners currently operating in higher cost areas.
- To develop a wide range of properties ranging from low to medium high-cost residential properties, shop offices and from small terrace factory to large detached factory to target a wide spectrum of customers' needs.

BUSINESS OUTLOOK

- The property market continues to remain challenging in the short and medium term due to the rising cost of construction resulting from fluctuations in building materials cost, inflation pressures and the uptrend in interest rate.
 - The normalization after re-opening of all economic sectors and international border and the improvement in the labour market are beneficial to the property market.
 - The full stamp duty exemption for first time home buyers buying a residential house worth RM500,000 and below and 75% exemptions for houses worth more than RM500,00 and up to RM1 million together with the reduction of Real Property Gains Tax rate for disposal made by individuals in the 6th year onwards are expected to support a recovery in the property sector.
 - The demand for landed properties in strategic growth areas with good infrastructure and connectivity is expected to remain resilient and hence the property development and construction division is expected to remain as the main profit contributor for the Group in financial year 2024.
